## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

a. Claims 1-8 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Davis. Davis discloses steps comprising providing a frame (22), mounting seat (14T) on the frame; pivotally mounting an upper and lower body support (12,70) and sitting on the seat and exercising the abdominals. As to claims 2-4, the lower support has a forward end and foot engaging portions where a user places their feet. As to claim 5, the user's own body weight is a resistance device. As to claim 4, the seat is rigidly connected (fig. 4). As to claim 6, a resistance device is disposed beneath the seat (fig. 1). As to claim 7, the pivot axis is beneath the seat. As to claim 8, the upper body support is transverse to

the seat. As to claim 10, a resistance is between the frame and the lower end of the upper body support.
